

THE POWER WITHIN™

PRESSURE WASHERS

WHY DO YOU NEED A PRESSURE WASHER?

Clean hundreds of items faster, better and easier!

Simply put, pressure washers make outdoor cleaning faster, easier and more fun! A pressure washer cleans everything from decks and driveways to siding, garage floors and cars. They deliver up to 75 times more power than an ordinary garden hose, giving you the power to blast away built-up mold, mildew, dirt and grime to restore surfaces to like-new condition in a fraction of the time it would normally take. Within minutes, you can hook it up to your home garden hose and be ready to clean.

Petrol-powered pressure washers deliver unbeatable cleaning performance, flexibility and durability giving you the freedom to clean anything, anywhere

WHAT PRESSURE WASHER IS RIGHT FOR YOU?

All pressure washers are measured in PSI and GPM. Both PSI and GPM are important for truly effective cleaning. The higher the combination of these numbers, the more area you can effectively clean allowing you to get the job done faster:

PSI is the water pressure developed, measured in pounds per square inch. It is what gives you the power to penetrate the dirt and grime.

GPM is the water flow delivered to the spray gun, measured in gallons or liters per minute. It gives you the power to break down the dirt and wash it away.

Product power & durability

Choosing a product that is powerful and durable enough to fit your cleaning needs is key. The heavier the duty level, the longer lasting and more powerful the cleaning machine is.

	Light Duty	1200-1900 PSI
	<p>SIZE Small projects</p> <p>CLEANING TIME 10-40 sq. ft. in 10 minutes</p> <p>HOW OFTEN Occasional cleaning</p>	<p>BEST SUITED FOR:</p> <ul style="list-style-type: none"> PAVEMENT VEHICLE FENCING GARAGE FLOOR STAIRS WALKS DECK OR PATIO DRIVEWAY OIL STAINS SECOND STORY STAINS PAINT PREP
	Medium Duty	1950-2600 PSI

FEATURES THAT MAKE A DIFFERENCE

When shopping for a pressure washer, look for features that you can depend on and those that will enable you to get easy starts, more effective cleaning, and longer life.

Engine

All Briggs & Stratton pressure washers are powered by Briggs & Stratton engines, which are designed for easy starting, reliable performance, reduced noise and longer life. For heavy duty cleaning projects, look for engines with an OHV design, which delivers a cooler, cleaner and more efficient engine.

Pump

Maintenance-free axial cam pumps with **Easy Start™ technology** are designed to make starting easier and smoother. Heavy-duty axial cam pumps are also maintenance free, but are also more durable and deliver greater performance for frequent use.

For the toughest jobs, the professional grade triplex plunger pump delivers maximum performance and is intended for daily use. It also comes equipped with adjustable pressure regulation, which allows you to match the pressure coming from the pump to your cleaning task.

Spray Nozzles

Ask your Dealer also about the various Spray Nozzels for different pressure and flow settings depending on your projects. For example : cars, patio furniture and lawn equipment need a delicate low pressure and high flow nozzle, whereas garage floors, wood decks or home siding need a general nozzle for medium pressure and medium flow. However, oil stains, rust or paint removal or other stubborn or hard to reach surfaces need a nozzle for maximum pressure and lower flow.

VISIT YOUR DEALER

A great resource for finding the right unit is your Local Dealer who handles pressure washers.

Be sure to start the unit and to try the controls. Don't hesitate to ask the dealer if he or she has a model that can be used for an on-site demonstration before making a final buying decision.

Know what you're looking at and how it can help you.

Familiarize yourself with the various features and parts of a pressure washer before comparison shopping.

ASK FOR SERVICE

All Briggs & Stratton powered products are supported by our large and unique service network. Should you need assistance, Briggs & Stratton has authorized warranty repair centers around the globe. Click "Find a Dealer" on our website <http://www.briggsandstratton.com>.
