Billy Goat Unveils Next-Generation Hurricane™ Stand-On Blowers: The Z3002 and X3002

Lee's Summit, MO – (October 21 2025) – [Billy Goat](#) is pleased to announce the launch of the new **Z3002** and **X3002 Hurricane™ Stand-On Blowers**. These models are built upon the robust performance of the prior 3001 series, incorporating significant new and carried-over upgrades focused on increasing durability, enhancing operator comfort, and improving ease of use.

Engineered for Durability and Performance (Building on the 3001 Series)

The new Hurricane™ series maintains its market-leading advantages by incorporating key structural and comfort enhancements that were recently applied to the prior 3001 series, ensuring a longer service life and better field performance. These **sustained upgrades** include:

- **Stronger front axles, foam-filled caster tires, and improved bearings** to withstand the toughest commercial environments.
- A convenient **side fill fuel tank with gauge** for easier refueling and monitoring.
- **Updated operator console** and heavier throttle and choke cables for more reliable control.

Next-Level Operator Control (New for the Z3002 & X3002)

The **Z3002 & X3002** models introduces the most significant new advancement with an updated **control module** that dramatically improves the operator experience:

- **Enhanced Protection and Durability:** The new module offers improved protection and eliminates temporary control resets, ensuring consistent operation throughout the workday.
- **Intuitive Gate Control:** The operator now has a more responsive, intuitive tap-to-adjust gate control—a short tap for minor adjustments or a longer tap for full open/close—providing precise control over airflow.

- **Simplified Operation:** The control system is no longer tied to the engine start and brake functions, streamlining the start-up sequence and boosting overall reliability.

Better Than Ever

With these comprehensive upgrades, the new Z and X series Hurricane™ Stand-On Blowers continue to deliver end users market-leading advantages, ensuring a **low cost of ownership** and **highest daily productivity**.

The Hurricane advantage includes:

- **Superior Durability and Comfort:** Features like the discharge nozzle protected behind the front axle minimize costly downtime, while the caster wheel and torsion bar suspension deliver a smoother ride and reduced operator fatigue.
- **Unmatched Operational Efficiency:** A massive **10-gallon fuel tank** allows crews to work up to **20% longer** between fills compared to competitive units, and **tri-directional blowing options** provide precision power for fewer passes.
- **Best-in-Class Transport:** A compact **65-inch footprint** (Z series) and dedicated tie-down points maximize trailer space and transport safety.
- **Patented Systems:** Exclusive technology, including a patented **automatic brake** and the unique split column/undercut design, saves time and delivers unrivaled performance.
- **The Power of Choice:** The full model range offers the best value, and the exclusive **D'ttach™ Accessory System** (including the Leaf Plow and Broom Kit) expands your capabilities to tackle debris that air alone can't handle.

The Z3002 and X3002 Hurricane™ Stand-On Blowers are available to order through the **Billy Goat dealer network**. They will be featured and displayed at **Equip Expo 2025** at the **Briggs & Stratton Booth**. More product details and specifications will be released online at **Billygoat.com** following the show.
