Ferris Mowers' Z1-PX Stand-On Mower Offers a Powerful New Option for Commercial Landscapers

Milwaukee, WI– Oct. 13, 2026 – [Ferris® Mowers'](#) newest commercial stand-on mower, the Z1-PX, is engineered specifically for landscapers who demand productivity, durability and cut quality without sacrificing agility.

Designed as a step up to maximum productivity, the Z1-PX combines a higher 9 mph ground speed, Hydro-Gear® ZT-3400® transaxles and increased 8 gallon fuel capacity with Ferris' maintenance-free uptime features and commercial-grade durability. Built with heavier-duty components, including a 7-gauge deck, the Z1-PX delivers rugged capability in deck sizes that include 36", 48" and 52".

"The Z1-PX was designed from the operator platform up to help commercial landscapers work faster, stay comfortable and reduce daily operating costs," said Carissa Gingras, Vice President Marketing Turf & Consumer and Service at Briggs & Stratton. "This new unit is part of our expanding stand-on portfolio and is a prime example of the innovation coming from Ferris that gives crews the confidence and uptime they need to be successful."

Built for Productivity, Comfort and Uptime

Designed around the needs of commercial mowing crews, the Z1-PX combines a smoother operator experience with the speed, control and durability required for demanding daily use. A 16-inch-wide suspended operator platform and outboard cleated footrests provide stability and control on varied terrain while its tunable rubber dampers help reduce fatigue. With one-hand three position selectable speed, a new linear dash layout, and magnetic height-of-cut pin, adjustments are quick and intuitive so landscapers can stay focused on mowing.

To help crews spend more time mowing and less time servicing equipment, the Z1-PX pairs maintenance-free spindles with simplified service points and easy-to-access transaxles.

The mower is designed to deliver strong commercial performance with engine options that include a 23hp Vanguard engine and 19hp or 24hp Kawasaki FX engine options. Its patent-pending AeroMax™ high-efficiency blade helps landscapers mow up to 20% more acres per gallon while preserving a clean, consistent cut, supporting both productivity and lower daily operating costs.

Ferris is also backing the Z1-PX with an improved limited warranty coverage of 4-years or 750-hours, whichever occurs first, with unlimited hours during the first 2 years of ownership.*

The Ferris Z1-PX is now available for dealer orders.

*See operator's manual for full warranty details.
