## WARNING

Briggs & Stratton does not approve or authorize the use of these engines on 3-wheel All Terrain Vehicles (ATVs), motor bikes, aircraft products or vehicles intended for use in competitive events. Use of these engines in such applications could result in property damage, serious injury (including paralysis), or even death.

Need assistance? Go to [www.briggsandstratton.com](http://www.briggsandstratton.com) for detailed information regarding Briggs & Stratton engines.

Or call, **1-800-233-3723**, (U.S.A. and Canada) to hear a menu of pre-recorded messages offering engine maintenance information.

## The Power That Works For You.™

### Look For Relevant Emissions Durability Period and Air Index Information On Your Engine Emissions Label

Engines that are certified to meet the California Air Resources Board (CARB) Tier 2 Emission Standards must display information regarding the Emissions Durability Period and the Air Index. Briggs & Stratton makes this information available to the consumer on our emission labels.

The **Emissions Durability Period** describes the number of hours of actual running time for which the engine is certified to be emissions compliant, assuming proper maintenance in accordance with the Operating & Maintenance Instructions. The following categories are used:

**Moderate:** Engine is certified to be emission compliant for 125 hours of actual engine running time.

**Intermediate:** Engine is certified to be emission compliant for 250 hours of actual engine running time.

**Extended:** Engine is certified to be emission compliant for 500 hours of actual engine running time.

For example, a typical walk-behind lawn mower is used 20 to 25 hours per year. Therefore, the **Emissions Durability Period** of an engine with an **intermediate** rating would equate to 10 to 12 years.

The **Air Index** is a calculated number describing the relative level of emissions for a specific engine family. The lower the **Air Index**, the cleaner the engine. This information is displayed in graphical form on the emissions label.

### After July 1, 2000, Look For Emissions Compliance Period On Engine Emissions Compliance Label

After July 1, 2000 certain Briggs & Stratton engines will be certified to meet the United States Environmental Protection Agency (USEPA) Phase 2 emission standards. For Phase 2 certified engines, the Emissions Compliance Period referred to on the Emissions Compliance label indicates the number of operating hours for which the engine has been shown to meet Federal emission requirements. For engines less than 225 cc displacement, Category C = 125 hours, B = 250 hours and A = 500 hours. For engines of 225 cc or more, Category C = 250 hours, B = 500 hours and A = 1000 hours.

The displacement of Model Series 120000 engine is 206 cc, Model Series 200000 engine is 305 cc, Model Series 210000 engine is 342 cc.

**This is a generic representation of the emission label typically found on a certified engine.**

### BEFORE OPERATING ENGINE

- Read entire Operating & Maintenance Instructions AND the instructions for the equipment this engine powers.\*
- Failure to follow instructions could result in serious injury or death.

### THE OPERATING & MAINTENANCE INSTRUCTIONS CONTAIN SAFETY INFORMATION TO

- Make you aware of hazards associated with engines
- Inform you of the risk of injury associated with those hazards, and
- Tell you how to avoid or reduce the risk of injury.

The safety alert symbol () is used to identify safety information about hazards that can result in personal injury.

A signal word (DANGER, WARNING, or CAUTION) is used with the alert symbol to indicate the likelihood and the potential severity of injury. In addition, a hazard symbol may be used to represent the type of hazard.

 **DANGER** indicates a hazard which, if not avoided, **will result in death or serious injury.**

 **WARNING** indicates a hazard which, if not avoided, **could result in death or serious injury.**

 **CAUTION** indicates a hazard which, if not avoided, **might result in minor or moderate injury.**

**CAUTION**, when used **without** the alert symbol, indicates a situation that **could result in damage to the engine.**

### WARNING

The engine exhaust from this product contains chemicals known to the State of California to cause cancer, birth defects, or other reproductive harm.

### HAZARD SYMBOLS AND MEANINGS

		
Fire	Explosion	Moving Parts
		
Toxic Fumes	Hot Surface	Shock
		
	Kickback	

### THE INTERNATIONAL SYMBOLS USED ON THE ENGINE OR IN THIS MANUAL INCLUDE:

		
Safety Alert	Read Owner's Manual	On Off
		
Fuel Shutoff	Fuel	Choke
		
	Oil	Stop

\* Briggs & Stratton does not necessarily know what equipment this engine will power. For that reason, you should carefully read and understand the operating instructions for the equipment on which your engine is placed.

**WARNING**

Gasoline and its vapors are extremely flammable and explosive.

Fire or explosion can cause severe burns or death.

**WHEN ADDING FUEL**

- Turn engine OFF and let engine cool at least 2 minutes before removing gas cap.
- Fill fuel tank outdoors or in well-ventilated area.
- Do not overfill fuel tank. Fill tank to approximately 1-1/2 inches below top of neck to allow for fuel expansion.
- Keep gasoline away from sparks, open flames, pilot lights, heat, and other ignition sources.
- Check fuel lines, tank, cap, and fittings frequently for cracks or leaks. Replace if necessary.

**WHEN STARTING ENGINE**

- Make sure spark plug, muffler and fuel cap are in place.
- Do not crank engine with spark plug removed.
- If fuel spills, wait until it evaporates before starting engine.
- If engine floods, set choke to OPEN/RUN position, place throttle in FAST and crank until engine starts.

**WHEN OPERATING EQUIPMENT**

- Do not tip engine or equipment at angle which causes gasoline to spill.
- Do not choke carburetor to stop engine.

**WHEN TRANSPORTING EQUIPMENT**

- Transport with fuel tank EMPTY or with fuel shut-off valve OFF.

**WHEN STORING GASOLINE OR EQUIPMENT WITH FUEL IN TANK**

- Store away from furnaces, stoves, water heaters or other appliances that have pilot light or other ignition source because they can ignite gasoline vapors.

**WARNING**

Starting engine creates sparking.

Sparking can ignite nearby flammable gases.

Explosion and fire could result.

- If there is natural or LP gas leakage in area, do not start engine.
- Do not use pressurized starting fluids because vapors are flammable.

**WARNING**

Rotating parts can contact or entangle hands, feet, hair, clothing, or accessories.

Traumatic amputation or severe laceration can result.

- Operate equipment with guards in place.
- Keep hands and feet away from rotating parts.
- Tie up long hair and remove jewelry.
- Do not wear loose-fitting clothing, dangling drawstrings or items that could become caught.

**WARNING**

Running engines produce heat. Engine parts, especially muffler, become extremely hot.

Severe thermal burns can occur on contact.

Combustible debris, such as leaves, grass, brush, etc. can catch fire.

- Allow muffler, engine cylinder and fins to cool before touching.
- Remove accumulated combustibles from muffler area and cylinder area.
- Install and maintain in working order a spark arrester before using equipment on forest-covered, grass-covered, brush-covered unimproved land. The state of California requires this (Section 4442 of the California Public Resources Code). Other states may have similar laws. Federal laws apply on federal land.

# SAFETY

## WARNING

Rapid retraction of starter cord (kick-back) will pull hand and arm toward engine faster than you can let go.

Broken bones, fractures, bruises or sprains could result.

- When starting engine, pull cord slowly until resistance is felt, then pull rapidly.
- Remove all external equipment/engine loads before starting engine.
- Direct coupled equipment components such as, but not limited to, blades, impellers, pulleys, sprockets, etc., must be securely attached.

## WARNING

Engines give off carbon monoxide, an odorless, colorless, poison gas.

Breathing carbon monoxide can cause nausea, fainting or death.

- Start and run engine outdoors.
- Do not start or run engine in enclosed area, even if doors or windows are open.

## WARNING

Unintentional sparking can result in fire or electric shock.

Unintentional start-up can result in entanglement, traumatic amputation, or laceration.

### BEFORE PERFORMING ADJUSTMENTS OR REPAIRS

- Disconnect spark plug wire and keep it away from spark plug.
- Disconnect battery at negative terminal (only engines with electric start).
- Unplug power supply (only engines equipped with 120V electric start)

### WHEN TESTING FOR SPARK

- Use approved spark plug tester.
- Do not check for spark with spark plug removed.

# ENGINE INFORMATION

## TECHNICAL INFORMATION

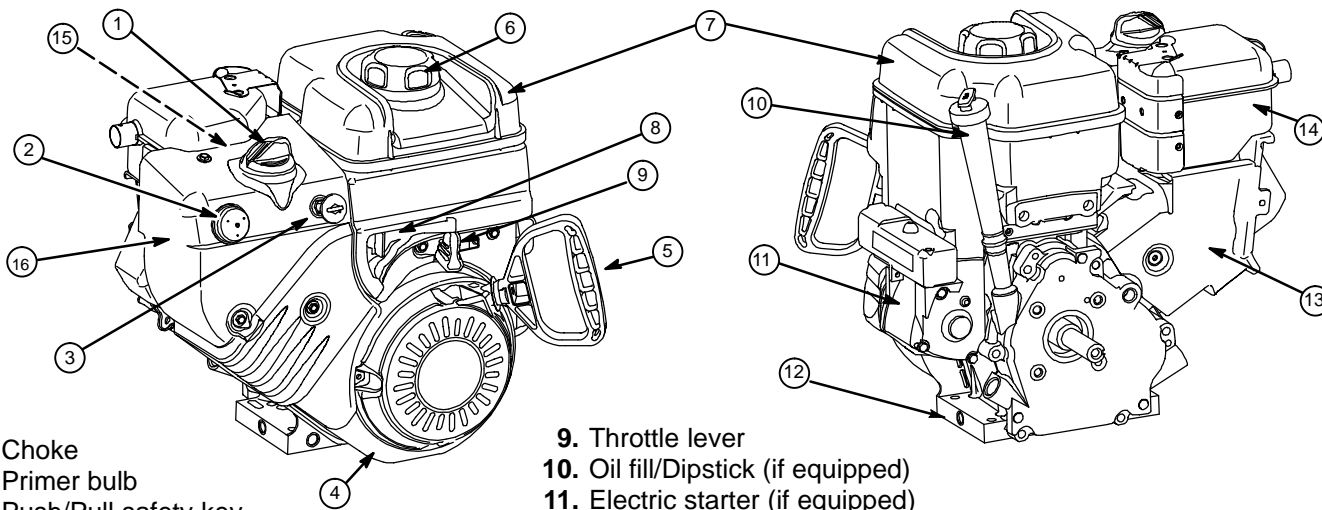

**POWER RATINGS:** The power ratings for an individual engine model are initially developed by starting with SAE (Society of Automotive Engineers) code J1940 (Small Engine Power & Torque Rating Procedure) (Revision 2002-05). Given both the wide array of products on which our engines are placed, and the variety of environmental issues applicable to operating the equipment, it may be that the engine you have purchased will not develop the rated horsepower when used in a piece of power equipment (actual "on-site" power). This difference is due to a variety of factors including, but not limited to, the following: differences in altitude, tempera-

ture, barometric pressure, humidity, fuel, engine lubrication, maximum governed engine speed, individual engine to engine variability, design of the particular piece of power equipment, the manner in which the engine is operated, engine run-in to reduce friction and clean out of combustion chambers, adjustments to the valves and carburetor, and other factors. The power ratings may also be adjusted based on comparisons to other similar engines utilized in similar applications, and will therefore not necessarily match the values derived using the foregoing codes.

## Intek™ Snow MODELS 120000, 200000, 210000

Model Series 120000, 200000, 210000 are single cylinder, over-head valve (OHV), air-cooled engines. If your engine is of this series it is a low emissions engine.

In the state of California, OHV Model Series 120000 engines are certified by the California Air Resources Board to meet emissions standards for 125 hours; the Model Series 200000 for 250 hours. Such certification does not grant the purchaser, owner or operator of this engine any additional warranties with respect to the performance or operational life of this engine. This engine is warranted solely according to the product and emissions warranties stated elsewhere in this manual.

### TUNE-UP SPECIFICATIONS

Armature air gap . . . 0.010 – 0.014 in. (0.25 – 0.36 mm)

Spark plug gap . . . . . 0.030 in. (0.76 mm)

**See Repair Manual P/N 272147.**

### MODEL SERIES 120000

Bore . . . . . 2.677 in. (68 mm)

Stroke . . . . . 2.205 in. (56 mm)

Displacement . . . . . 12.48 cu. in. (206 cc)

### MODEL SERIES 200000

Bore . . . . . 3.120 in. (79.23 mm)

Stroke . . . . . 2.438 in. (61.67 mm)

Displacement . . . . . 18.64 cu. in. (305 cc)

### MODEL SERIES 210000

Bore . . . . . 3.300 in. (83.82 mm)

Stroke . . . . . 2.438 in. (61.67 mm)

Displacement . . . . . 20.85 cu. in. (342 cc)

Measure valve clearance with valve springs installed and piston 1/4 in. (6 mm) past top dead center. Check when engine is cold.

Intake . . . . . 0.004 – 0.006 in. (0.10 – 0.15 mm)

Exhaust . . . . . 0.009 – 0.011 in. (0.23 – 0.28 mm)

## Industrial Plus™ Snow MODEL 90000

This is a single cylinder, L-head, air-cooled engine. It is a low emissions engine.

### TUNE-UP SPECIFICATIONS

Armature air gap . . . 0.006 – 0.010 in. (0.15 – 0.25 mm)

Spark plug gap . . . . . 0.030 in. (0.76 mm)

**See Repair Manual P/N 270962.**

Bore . . . . . 2.562 in. (65.09 mm)

Stroke . . . . . 1.750 in. (44.45 mm)

Displacement . . . . . 9.02 cu. in. (148.0 cc)

Measure valve clearance with valve springs installed and piston 1/4 in. (6 mm) past top dead center. Check when engine is cold.

Intake . . . . . 0.005 – 0.007 in. (0.13 – 0.18 mm)

Exhaust . . . . . 0.007 – 0.009 in. (0.18 – 0.23 mm)

**Note:** For practical operation, horsepower loading should not exceed 85% of rated horsepower. Engine power will decrease 3-1/2% for each 1,000 feet (300 meters) above sea level and 1%

for each 10° F (5.6° C) above 77° F (25° C). Engine will operate satisfactorily at an angle up to 15°.

**OIL**

**CAUTION:** This engine is shipped from Briggs & Stratton **without oil**. Check oil level before starting engine. If you start the engine without oil, the engine will be damaged beyond repair and will not be covered under warranty.

### OIL CAPACITY

Model Series	Capacity
90000	18 – 20 oz. (0.53 – .055 l)
120000	20 oz. (0.55 l)
200000 / 210000	28 oz. (0.83 l)

### TYPE OF OIL TO USE

- Use a high quality detergent oil classified “For Service SF, SG, SH, SJ” or higher. Briggs & Stratton strongly recommends the use of synthetic oil for operating temperatures below 32° F (0° C). If synthetic oil is unavailable, Briggs & Stratton non-synthetic 5W-30 P/N 100030C (32 oz.) is an acceptable substitute.
- Do not use special additives.
- Choose a viscosity according to the table opposite.

\* **CAUTION:** Air cooled engines run hotter than automotive engines. The use of non-synthetic multi-viscosity oils (5W-30, 10W-30, etc.) in temperatures above 40° F (4° C) will result in higher than normal oil consumption. When using a multi-viscosity oil, check oil level more frequently.

**Note:** Synthetic oil meeting ILSAC GF-2, API certification mark and API service symbol (shown at left) with “SJ/CF ENERGY CONSERVING” or higher, is an acceptable oil at all temperatures. **Use of synthetic oil does not alter required oil change intervals.**

### CHECKING AND ADDING OIL

- Check oil level *before* starting the engine.
- Check level daily, or after every eight (8) hours.
- Keep oil level at FULL mark.
- Do not overfill.

**CAUTION: OIL GARD®** (if equipped) is intended to prevent starting an engine that is low on oil. **OIL GARD®** may not shut down a running engine.

#### High Oil Fill (if equipped)

- Place engine level and clean around oil fill area.
- Remove dipstick and wipe with clean cloth. Replace and tighten dipstick. Remove and check oil level.
- Pour oil slowly. Fill to FULL line on dipstick – recheck.
- Replace and tighten dipstick.

#### Low Oil Fill

- Place engine level and clean around oil fill area.
- Remove oil fill cap.
- Pour oil slowly. Fill to point of overflowing.
- Replace and tighten oil fill cap.

## TYPE OF FUEL TO USE

- ◆ Use clean, fresh, regular unleaded gasoline with a minimum of **85** octane. On Model Series 90000 use fuel with a minimum of 77 octane. Fresh fuel prevents gum from forming in the fuel system or on essential carburetor parts. Purchase fuel in quantity that can be used within 30 days.
- ◆ Do not use gasoline left over from summer. Use winter grade gasoline which has higher volatility to improve starting.
- ◆ Do not use gasoline which contains Methanol.
- ◆ Do not mix oil with gasoline.

- ◆ For engine protection use Briggs & Stratton Gasoline Additive available from your Authorized Briggs & Stratton Dealer (P/N 5041 or single use pouch).
- ◆ This engine is certified to operate on gasoline. Exhaust Emission Control System: EM (Engine Modifications).

**CAUTION:** Some fuels, called oxygenated or reformulated gasoline, are gasoline blended with alcohols or ethers. Excessive amounts of these blends can damage the fuel system or cause performance problems. If any undesirable operating symptoms occur, use gasoline with a lower percentage of alcohol or ether.

## ADDING FUEL

<b>WARNING</b>
<ul style="list-style-type: none"> <li>• Fill fuel tank outdoors or in well-ventilated area, away from sparks, open flames, pilot lights, heat, and other ignition sources.</li> <li>• If fuel spills, wait until it evaporates before starting engine.</li> <li>• Turn engine OFF and let engine cool at least 2 minutes before removing gas cap.</li> </ul>

- [1.] Remove cap. Fill tank to approximately 1-1/2 inches below top of neck to allow for fuel expansion. Be careful not to overfill. Briggs & Stratton **Smart-fill® fuel can** fills to the correct level and automatically shuts off, reducing spills and emissions.
- [2.] Replace cap before starting.

<b>WARNING</b>
<ul style="list-style-type: none"> <li>• Do not use pressurized starting fluids.</li> <li>• Vapors are flammable.</li> </ul>

<b>WARNING</b>
<p>Do not stop engine by moving choke control to CHOKE. Backfire, fire or engine damage could occur.</p>

## STARTING AND OPERATING TIPS

- ◆ Store and fuel equipment in level position.
- ◆ Use fresh fuel. (See Fuel.)
- ◆ Use correct type of oil for expected starting temperature. (See Oil.)
- ◆ Remove external equipment/engine loads. (See equipment operating instructions.)
- ◆ Periodically remove any debris buildup from the machine (See Maintenance.)
- ◆ After engine has started, let it warm up several seconds to several minutes, depending on outside temperature.
- ◆ For maximum performance and life, operate engine with choke in RUN and throttle in FAST.

# STARTING AND STOPPING

BRIGGS & STRATTON

## REWIND (MANUAL) STARTER

Intek™ Snow MODELS 120000, 200000, 210000

### To Start Engine:

- [1.] Check oil level.
- [2.] Turn fuel shut-off valve 1/4 turn to OPEN (if equipped).
- [3.] Push safety key IN (if equipped).
- [4.] Turn rotary choke knob to CHOKE position.
- [5.] Depress primer.  
**Note:** If temperature is 15° F (–9° C) or higher push primer **two** times, if below 15° F (–9° C) push primer **four** times.
- [6.] Move throttle to FAST position. Operate engine with throttle in FAST.
- [7.] Grasp rope handle. Pull slowly until resistance is felt, then pull rapidly to start engine and avoid kickback.
- [8.] Allow engine to warm up several minutes, adjusting choke toward RUN position. Wait until engine runs smoothly before each choke adjustment.

Fuel shut-off

Rotary Choke Knob (Top) and Primer

Throttle Control

Safety Key

### To Stop Engine:

- [1.] Move throttle control to SLOW, then to STOP.
- [2.] Pull safety key OUT (if equipped).
- [3.] Close fuel shut-off valve (if equipped).

Pull rope handle

## Industrial Plus™ Snow MODEL 90000

### To Start Engine:

- [1.] Check oil level.
- [2.] Move choke lever to start position.
- [3.] Depress primer (if equipped).  
**Note:** If temperature is 15° F (–9° C) or higher push primer **two** times, if below 15° F (–9° C) push primer **four** times.
- [4.] Grasp rope handle. Pull slowly until resistance is felt, then pull rapidly to start engine and avoid kickback.
- [5.] Allow engine to warm up several minutes, adjusting choke toward RUN position. Wait until engine runs smoothly before each choke adjustment.

Pull rope handle

### To Stop Engine:

- [1.] Turn key to OFF position (if equipped).

Typical Key Switch

- [2.] Close fuel shut-off valve (if equipped).

# STARTING AND STOPPING

## ELECTRIC STARTER (if equipped)

Intek™ Snow MODELS 120000, 200000, 210000

### To Start Engine:

- [1.] Check oil level.
- [2.] Turn fuel shut-off valve (if equipped) 1/4 turn to OPEN.
- [3.] Push safety key IN (if equipped).
- [4.] Turn rotary choke knob to CHOKE position.
- [5.] Depress primer.  
**Note:** If temperature is 15° F (–9° C) or higher push primer **two** times, if below 15° F (–9° C) push primer **four** times.
- [6.] Move throttle to FAST position. Operate engine with throttle in FAST.
- [7.] Connect power.
- [8.] Depress starter button.

### CAUTION:

To prolong starter life, use short starting cycles (5 seconds maximum, then wait one minute). Follow equipment manufacturer's recommendations for charging battery.

- [9.] Allow engine to warm up several minutes, adjusting choke toward RUN position. Wait until engine runs smoothly before each choke adjustment.
- [10.] **IMPORTANT:** After engine starts, unplug extension cord from starter.

Fuel shut-off

Rotary Choke Knob (Top) and Primer

Throttle Control

Safety Key

Electric Start Button

### WARNING

- Use a 3-wire extension cord.
- Plug cord into starter motor first, then into wall receptacle. If additional extension cord is required, use a 3-wire.
- If the supply cord is damaged, it must be replaced by the manufacturer or its service agent or a similarly qualified person in order to avoid a hazard.

### To Stop Engine:

- [1.] Move throttle control to SLOW, then to STOP.
- [2.] Pull safety key OUT (if equipped).
- [3.] Close fuel shut-off valve (if equipped).

# STARTING AND STOPPING

BRIGGS & STRATTON

## ELECTRIC STARTER (if equipped)

### Industrial Plus™ Snow MODEL 90000

#### To Start Engine:

- [1.] Check oil level.
- [2.] Move choke lever to start position.
- [3.] Depress primer (if equipped).

**Note:** If temperature is 15° or higher push primer **two** times, if below 15° push primer **four** times.

- [4.] Turn key to start (if equipped).
- [5.] Depress starter button.

#### CAUTION:

To prolong starter life, use short starting cycles (5 seconds maximum, then wait one minute). Follow equipment manufacturer's recommendations for charging battery.

- [6.] Allow engine to warm up several minutes, slowly adjusting choke. Wait until engine runs smoothly before each choke adjustment.

Typical Choke Lever

Typical Primer

Typical Key Switch

Typical Electric Start Button

#### To Stop Engine:

- [1.] Turn key to OFF position (if equipped).

Typical Key Switch

## MAINTENANCE

Regular maintenance will improve the performance and extend the life of the engine. See any Authorized Briggs & Stratton Dealer for service. **Use only genuine Briggs & Stratton parts. Other parts may not perform as well, may damage the engine, and may result in injury.** In addition, use of other parts may void your warranty.

Follow the instructions and schedules indicated below.

Task	Every 8 Hours or Daily	25 Hours or Every Season	50 Hours or Every Season	100 Hours or Every Season	Yearly
<i>Perform task at hourly or calendar interval, whichever comes first.</i>					
Check Oil Level	✓				
Change Oil			✓*		
Inspect spark arrester (if equipped)			✓		
Replace spark plug				✓	
Replace fuel filter (if equipped)				✓	
Check valve clearance					✓

\* **Change oil after first 5 to 8 hours of use**, then every 50 hours or every season. Change oil every 25 hours when operating the engine under heavy load.

**CAUTION:** Used oil is a hazardous waste product. Dispose of used oil properly. Do not discard with household waste. Check with your local authorities, service center, or dealer for safe disposal/recycling facilities.

## AIR FILTER

This engine is **not equipped** with an air filter. **DO NOT use this engine for anything other than snow removal.**

## FUEL SYSTEM

Replacement parts for fuel system (cap, hoses, tanks, filters, etc.) must be the same as original parts, otherwise fire can occur.

## EMISSION CONTROL

**Maintenance, replacement or repair of the emission control devices and systems may be performed by any nonroad engine repair establishment or individual.** However, to obtain no charge repairs under the terms and provisions of the Briggs & Stratton warranty statement, any service or emission control part repair or replacement must be performed by a factory authorized dealer.

## CHANGING OIL

1/4" HEX

PIPE

OIL DRAIN PLUG

### Typical drain plugs

- [1.] Place engine level and remove safety key (if equipped).
- [2.] Disconnect spark plug wire and keep it away from spark plug. Disconnect from power source (if equipped with electric starter).
- [3.] With engine OFF but still warm remove oil drain plug and drain oil into appropriate receptacle.
- [4.] Reinstall drain plug.
- [5.] Add oil per specifications for your engine. Follow instructions for high and low oil fill in *Checking and Adding Oil* under **OIL** section.

High Oil Fill

Low Oil Fill

## ENGINE AND ENGINE PARTS

We recommend that you see an authorized Briggs & Stratton Service Dealer for all maintenance and service of the engine and engine parts. Use only genuine Briggs & Stratton parts.

### WARNING

- Do not strike the flywheel with a hammer or hard object because the flywheel may later shatter during operation.
- Do not tamper with governor spring, links or other parts to increase engine speed.

### WARNING

If you perform any maintenance on the engine, begin by removal of safety key (if equipped), disconnecting the spark plug wire from the spark plug, and disconnecting the battery at the negative terminal (electric starter engines only) to prevent unintentional sparking. Unintentional sparking can result in fire or electric shock. Unintentional start-up can result in entanglement, traumatic amputation or laceration. Use only correct tools.

## SPARK PLUG

Use only Briggs & Stratton Spark Tester (part number 19368) to check for spark.

### WARNING

- Do not check for spark with spark plug removed.
- Use approved spark plug tester.

RESISTOR P/N 491055

**Note:** In some areas, local law requires using resistor spark plug to suppress ignition signals. If this engine was originally equipped with resistor spark plug, use same type for replacement.

## Intek™ Snow MODEL 120000

**Note:** Model Series 120000 spark plug is accessed by removing the snow hood.

### REMOVING SNOW HOOD

- [3.] Slowly dismantle the snow hood, ensuring primer bulb hose and ignition wire remain connected.

SPARK PLUG LOCATION

### INSTALLING SNOW HOOD

- [3.] Align tab on choke control knob with slot on snow hood.
- [4.] Connect choke control knob with choke shaft on carburetor. If not properly connected, choke will be inoperable.

# MAINTENANCE

## CLEANING DEBRIS

**CAUTION:** Do not use water to clean engine parts. Water could contaminate fuel system. Use a brush or dry cloth.

Daily or before every use, clean accumulated debris from engine. Keep linkage, spring and controls clean. Keep area around and behind muffler free of any combustible debris.

	<b>WARNING</b>

Engine parts should be kept clean to reduce the risk of overheating and ignition of accumulated debris.

## MUFFLER

	<b>WARNING</b>

Replacement parts for the muffler must be the same and installed in the same position as the original parts, otherwise fire can occur.

If muffler is equipped with spark arrester screen, remove screen for inspection. Replace screen if damaged or plugged.

# ADJUSTMENTS

## CARBURETOR ADJUSTMENT

	<b>WARNING</b>
	Prevent unintentional starting. Before performing adjustments:
	<ul style="list-style-type: none"> <li>• Remove spark plug wire from spark plug.</li> <li>• Disconnect battery at negative terminal (only engines with electric start).</li> </ul>

<b>WARNING</b>
----------------

The manufacturer of the equipment on which this engine is installed specifies top speed at which the engine will be operated. **DO NOT EXCEED** this speed.

The carburetor on this engine is low emission. It is equipped with a non-adjustable idle mixture valve and governed idle, if equipped. Governed idle and top speed have been set at the factory. If adjustment is required, see an Authorized Briggs & Stratton Service Dealer.

## THROTTLE ADJUSTMENT

If the engine does not start or if it runs roughly, the throttle control may need adjustment. See your authorized Briggs & Stratton dealer.

**Note:** Engines operated at about 3000 to 5000 feet (900 to 1500 meters) above sea level may require a high altitude carburetor main jet. If erratic performance is observed, contact a Briggs & Stratton Authorized Service Dealer for cost to install/purchase a high altitude carburetor main jet, if available.

# SERVICE & STORAGE

## SERVICE

See an Authorized Briggs & Stratton Service Dealer. Each one carries a stock of Genuine Briggs & Stratton Parts and is equipped with special service tools. Trained mechanics assure expert repair service on all Briggs & Stratton engines. Only dealers advertising as "Authorized Briggs & Stratton" are required to meet Briggs & Stratton standards.

When you purchase equipment powered by a Briggs & Stratton engine, you are assured of highly skilled, reliable service at more than 30,000 Authorized Service Dealers worldwide, including more than 5,000 Master Service Technicians. Look for these signs wherever Briggs & Stratton service is offered.

You may locate your nearest Authorized Briggs & Stratton Service Dealer in our dealer locator map on our web site [www.briggsandstratton.com](http://www.briggsandstratton.com) or in the "Yellow Pages"™

 directory under "Engines, Gasoline" or "Gasoline Engines," or "Lawn Mowers" or similar category.

**Note:** Walking fingers logo and "Yellow Pages" are registered trademarks in various jurisdictions.

An illustrated shop manual includes common specifications and detailed information covering adjustment, tune-up and repair of Briggs & Stratton engines. It is available for purchase from an Authorized Briggs & Stratton Service Dealer or you can order it from the factory.

## PARTIAL LIST OF GENUINE BRIGGS & STRATTON PARTS

<u>PART</u>	<u>BRIGGS &amp; STRATTON PART NO. (or equivalent)</u>
Oil (SAE 5W-30, 32 oz.)	100030C
Gas additive	5041
Resistor spark plug	491055
(Models 120000/200000/210000)	
Long life platinum spark plug	5066
(Models 120000/200000/210000)	
Resistor spark plug (Model 90000)	496018
Standard spark plug (Model 90000)	492167
Spark plug wrench	89838
Spark tester	19368
Oil pump kit	5056
(uses standard electric drill to remove oil from engine quickly)	
Maintenance Kit (Model 120000)	5113A
Maintenance Kit (Models 200000/210000)	5112A

## STORAGE

Engines stored over 30 days need special attention.

- [1.] To prevent gum from forming in fuel system or on essential carburetor parts:
  - a) if fuel tank contains oxygenated or reformulated gasoline (gasoline blended with an alcohol or an ether), run engine until it stops from lack of fuel, **or**
  - b) if fuel tank contains gasoline, either run engine until it stops from lack of fuel, or add a gasoline additive to the gas in the tank. (See parts list. Single-use pouches of gas additive are available from your service dealer.) If you use a gas additive, run the engine for several minutes to circulate the additive through the carburetor. Then, engine and fuel can be stored up to 24 months.
- [2.] While engine is still warm, change oil.

- [3.] Remove spark plug and pour about 1/2 oz. (15 ml) of engine oil into cylinder. Replace spark plug and crank slowly to distribute oil.
- [4.] Clean engine of surface debris.
- [5.]

Store in a clean, dry area. Do not store in same area as a stove, furnace, water heater, or other appliance that uses a pilot light or has a device that can create a spark.

# BRIGGS & STRATTON ENGINE OWNER WARRANTY POLICY

Effective January 1, 2003 replaces all undated Warranties and all Warranties dated before January 1, 2003

## LIMITED WARRANTY

Briggs & Stratton Corporation will repair or replace, free of charge, any part(s) of the engine that is defective in material or workmanship or both. Transportation charges on parts submitted for repair or replacement under this warranty must be borne by purchaser. This warranty is effective for the time periods and subject to the conditions stated below. For warranty service, find the nearest Authorized Service Dealer in our dealer locator map at [www.briggsandstratton.com](http://www.briggsandstratton.com), or by calling 1-800-233-3723, or as listed in the 'Yellow Pages™'.

THERE IS NO OTHER EXPRESS WARRANTY. IMPLIED WARRANTIES, INCLUDING THOSE OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE, ARE LIMITED TO ONE YEAR FROM PURCHASE, OR TO THE EXTENT PERMITTED BY LAW ANY AND ALL IMPLIED WARRANTIES ARE EXCLUDED. LIABILITY FOR INCIDENTAL OR CONSEQUENTIAL DAMAGES ARE EXCLUDED TO THE EXTENT EXCLUSION IS PERMITTED BY LAW. Some states or countries do not allow limitations on how long an implied warranty lasts, and some states or countries do not allow the exclusion or limitation of incidental or consequential damages, so the above limitation and exclusion may not apply to you. This warranty gives you specific legal rights and you may also have other rights which vary from state to state and country to country.

## OUR PRODUCT

------------------	---	---	-----------------	--------------

## WARRANTY PERIOD\*

Consumer Use	2 years	2 years	2 years	1 year	1 year
Commercial Use		1 year	90 days	90 days	

\* **Note the following special warranty periods: 2 years** for Classic™ engines in the European Union and Eastern European countries, for all consumer products in the European Union, and for emission control systems on engines certified by EPA and CARB. **5 years** for consumer use, 90 days for commercial use of Touch-N-Mow® starter on Quantum® and Intek™ engines. **Engines used in competitive racing or on commercial or rental tracks are not warranted.**

The warranty period begins on the date of purchase by the first retail consumer or commercial end user, and continues for the period of time stated in the table above. "Consumer use" means personal residential household use by a retail consumer. "Commercial use" means all other uses, including use for commercial, income producing or rental purposes. Once an engine has experienced commercial use, it shall thereafter be considered as a commercial use engine for purposes of this warranty.

**NO WARRANTY REGISTRATION IS NECESSARY TO OBTAIN WARRANTY ON BRIGGS & STRATTON PRODUCTS. SAVE YOUR PROOF OF PURCHASE RECEIPT. IF YOU DO NOT PROVIDE PROOF OF THE INITIAL PURCHASE DATE AT THE TIME WARRANTY SERVICE IS REQUESTED, THE MANUFACTURING DATE OF THE PRODUCT WILL BE USED TO DETERMINE THE WARRANTY PERIOD.**

## ABOUT YOUR ENGINE WARRANTY

Briggs & Stratton welcomes warranty repair and apologizes to you for being inconvenienced. Any Authorized Service Dealer may perform warranty repairs. Most warranty repairs are handled routinely, but sometimes requests for warranty service may not be appropriate. For example, warranty would not apply if engine damage occurred because of misuse, lack of routine maintenance, shipping, handling, warehousing or improper installation. Similarly, warranty is void if the serial number of the engine has been removed or the engine has been altered or modified.

If a customer differs with the decision of the Service Dealer, an investigation will be made to determine whether the warranty applies. Ask the Service Dealer to submit all supporting facts to his Distributor or the Factory for review. If the Distributor or the Factory decides that the claim is justified, the customer will be fully reimbursed for those items that are defective. To avoid misunderstanding which might occur between the customer and the Dealer, listed below are some of the causes of engine failure that the warranty does not cover.

### Normal wear:

Engines, like all mechanical devices, need periodic parts service and replacement to perform well. Warranty will not cover repair when normal use has exhausted the life of a part or an engine.

### Improper maintenance:

The life of an engine depends upon the conditions under which it operates, and the care it receives. Some applications, such as tillers, pumps and rotary mowers, are very often used in dusty or dirty conditions, which can cause what appears to be premature wear. Such wear, when caused by dirt, dust, spark plug cleaning grit, or other abrasive material that has entered

the engine because of improper maintenance, is not covered by warranty.

**This warranty covers engine related defective material and/or workmanship only, and not replacement or refund of the equipment to which the engine may be mounted. Nor does the warranty extend to repairs required because of:**

1. PROBLEMS CAUSED BY PARTS THAT ARE NOT ORIGINAL BRIGGS & STRATTON PARTS.
2. Equipment controls or installations that prevent starting, cause unsatisfactory engine performance, or shorten engine life. (Contact equipment manufacturer.)
3. Leaking carburetors, clogged fuel pipes, sticking valves, or other damage, caused by using contaminated or stale fuel. (Use clean, fresh, lead-free gasoline and Briggs & Stratton Fuel Stabilizer, Part No. 5041.)
4. Parts which are scored or broken because an engine was operated with insufficient or contaminated lubricating oil, or an incorrect grade of lubricating oil (check oil level daily or after every 8 hours of operation. Refill when necessary and change at recommended intervals.) OIL GARD® may not shut down running engine. Engine damage may occur if oil level is not properly maintained. Read Operating & Maintenance Instructions.
5. Repair or adjustment of associated parts or assemblies such as clutches, transmissions, remote controls, etc., which are not manufactured by Briggs & Stratton.
6. Damage or wear to parts caused by dirt, which entered the engine because of improper air cleaner maintenance, re-assembly, or use of a non-original air cleaner element or cartridge. (At recommended

7. Parts damaged by over-speeding, or overheating caused by grass, debris, or dirt, which plugs or clogs the cooling fins, or flywheel area, or damage caused by operating the engine in a confined area without sufficient ventilation. (Clean fins on the cylinder, cylinder head and flywheel at recommended intervals.) Read Operating & Maintenance Instructions.
8. Engine or equipment parts broken by excessive vibration caused by a loose engine mounting, loose cutter blades, unbalanced blades or loose or unbalanced impellers, improper attachment of equipment to engine crankshaft, over-speeding or other abuse in operation.
9. A bent or broken crankshaft, caused by striking a solid object with the cutter blade of a rotary lawn mower, or excessive v-belt tightness.
10. Routine tune-up or adjustment of the engine.
11. Engine or engine component failure, i.e., combustion chamber, valves, valve seats, valve guides, or burned starter motor windings, caused by the use of alternate fuels such as, liquified petroleum, natural gas, altered gasolines, etc.

**Warranty is available only through service dealers which have been authorized by Briggs & Stratton Corporation. your nearest Authorized Service Dealer is listed in the "Yellow Pages™" of your telephone directory under "Engines, Gasoline" or "Gasoline Engines," "Lawn Mowers," or similar category.**

**Briggs & Stratton Corporation (B&S), the California Air Resources Board (CARB)  
and the United States Environmental Protection Agency (U.S. EPA)  
Emission Control System Warranty Statement (Owner's Defect Warranty Rights and Obligations)**

EMISSION CONTROL WARRANTY COVERAGE IS APPLICABLE TO CERTIFIED ENGINES PURCHASED IN CALIFORNIA IN 1995 AND THEREAFTER, WHICH ARE USED IN CALIFORNIA, AND TO CERTIFIED MODEL YEAR 1997 AND LATER ENGINES WHICH ARE PURCHASED AND USED ELSEWHERE IN THE UNITED STATES (AND AFTER JANUARY 1, 2001 IN CANADA).

**California and United States Emission Control Defects Warranty Statement**

The California Air Resources Board (CARB), U.S. EPA and B&S are pleased to explain the Emission Control System Warranty on your model year 2002 and later small off-road engine (SORE). In California, new small off-road engines must be designed, built and equipped to meet the State's stringent anti-smog standards.

Elsewhere in the United States, new non-road, spark-ignition engines certified for model year 1997 and later must meet similar standards set forth by the U.S. EPA. B&S must warrant the emission control system on your engine for the periods of time listed below, provided there has been no abuse, neglect or improper maintenance of your small off-road engine.

Your emission control system includes parts such as the carburetor, air cleaner, ignition system, muffler and catalytic converter. Also included may be connectors and other emission related assemblies.

Where a warrantable condition exists, B&S will repair your small off-road engine at no cost to you including diagnosis, parts and labor.

**Briggs & Stratton Emission Control Defects Warranty Coverage**

Small off-road engines are warranted relative to emission control parts defects for a period of two years, subject to provisions set forth below. If any covered part on your engine is defective, the part will be repaired or replaced by B&S.

**Owner's Warranty Responsibilities**

As the small off-road engine owner, you are responsible for the performance of the required maintenance listed in your Operating and Maintenance Instructions. B&S recommends that you retain all your receipts covering maintenance on your small off-road engine, but B&S cannot deny warranty solely for the lack of receipts or for your failure to ensure the performance of all scheduled maintenance.

As the small off-road engine owner, you should however be aware that B&S may deny you warranty coverage if your small off-road engine or a part has failed due to abuse, neglect, improper maintenance or unapproved modifications. You are responsible for presenting your small off-road engine to an Authorized B&S Service Dealer as soon as a problem exists.

The undisputed warranty repairs should be completed in a reasonable amount of time, not to exceed 30 days.

If you have any questions regarding your warranty rights and responsibilities, you should contact a B&S Service Representative at 1-414-259-5262.

The emission warranty is a defects warranty. Defects are judged on normal engine performance. The warranty is not related to an in-use emission test.

**Briggs & Stratton Emission Control Defects Warranty Provisions**

The following are specific provisions relative to your Emission Control Defects Warranty Coverage. It is in addition to the B&S engine warranty for non-regulated engines found in the Operating and Maintenance Instructions.

1. **Warranted Parts**  
Coverage under this warranty extends only to the parts listed below (the emission control systems parts) to the extent these parts were present on the engine purchased.
  - a. **Fuel Metering System**
    - Cold start enrichment system
    - Carburetor and internal parts
    - Fuel Pump
  - b. **Air Induction System**
    - Air cleaner
    - Intake manifold
  - c. **Ignition System**
    - Spark plug(s)
    - Magneto ignition system
  - d. **Catalyst System**
    - Catalytic converter
    - Exhaust manifold
    - Air injection system, Pulse valve
  - e. **Miscellaneous Items**
    - Vacuum, temperature, position, time sensitive valves and switches
    - Connectors and assemblies
2. **Length of Coverage**  
B&S warrants to the initial owner and each subsequent purchaser that the Warranted Parts shall be free from defects in materials and workmanship which caused the failure of the Warranted Parts for a period of two years from the date the engine is delivered to a retail purchaser.
3. **No Charge**  
Repair or replacement of any Warranted Part will be performed at no charge to the owner, including diagnostic labor which leads to the determination that a Warranted Part is defective, if the diagnostic work is performed at an Authorized B&S Service Dealer. For emissions warranty service contact your nearest Authorized B&S Service Dealer as listed in the "Yellow Pages" under "Engines, Gasoline," "Gasoline Engines," "Lawn Mowers," or similar category.
4. **Claims and Coverage Exclusions**  
Warranty claims shall be filed in accordance with the provisions of the B&S Engine Warranty Policy. Warranty coverage shall be excluded for failures of Warranted Parts which are not original B&S parts or because of abuse, neglect or improper maintenance as set forth in the B&S Engine Warranty Policy. B&S is not liable to cover failures of Warranted Parts caused by the use of add-on, non-original, or modified parts.
5. **Maintenance**  
Any Warranted Part which is not scheduled for replacement as required maintenance or which is scheduled only for regular inspection to the effect of "repair or replace as necessary" shall be warranted as to defects for the warranty period. Any Warranted Part which is scheduled for replacement as required maintenance shall be warranted as to defects only for the period of time up to the first scheduled replacement for that part. Any replacement part that is equivalent in performance and durability may be used in the performance of any maintenance or repairs. The owner is responsible for the performance of all required maintenance, as defined in the B&S Operating and Maintenance Instructions.
6. **Consequential Coverage**  
Coverage hereunder shall extend to the failure of any engine components caused by the failure of any Warranted Part still under warranty.

Briggs & Stratton Engines Are Made Under One Or More Of The Following Patents: Design D-247,177 (Other Patents Pending)										
6,325,036	6,077,063	5,819,513	5,606,948	5,497,679	5,235,943	5,138,996	4,996,956	4,633,556	4,430,984	DES. 308,871

**La Corporation Briggs & Stratton (B&S), le California Air Resources Board (CARB) et le Bureau de protection environnementale des Etats-Unis (US EPA)**

**Garantie sur le système d'échappement (Garantie contre les défauts, droits et obligations du propriétaire)**

LA GARANTIE SUR LE SYSTÈME D'ÉCHAPPEMENT EST APPLICABLE SUR LES MOTEURS CERTIFIÉS ACHETÉS EN CALIFORNIE EN 1995 ET LES ANNÉES SUIVANTES ET QUI SONT UTILISÉS EN CALIFORNIE, AINSI QU'ÀUX MODÈLES CERTIFIÉS DE 1997 ET LES ANNÉES SUIVANTES.

VANTES QUI ONT ÉTÉ ACHETÉS ET UTILISÉS AILLEURS AUX ETATS-UNIS (ET APRÈS LE 1ER JANVIER 2001 AU CANADA).

**Déclaration de garantie sur le système d'échappement pour la Californie, les Etats-Unis**

Le California Air Resources Board (CARB), le Bureau américain de protection environnementale (U.S. EPA) et B & S sont heureux d'expliquer la garantie sur le système d'échappement des petits moteurs hors-route de votre modèle 2000 et des années ultérieures (SORE). En Californie, les nouveaux petits moteurs hors route doivent être conçus, construits et équipés pour rencontrer les standards rigoureux d'antipollution. Ailleurs aux Etats-Unis, les nouveaux moteurs hors route à bougie d'allumage certifiés pour les modèles de 1997 et plus, doivent rencontrer des normes similaires mises de l'avant par le U.S. EPA. Briggs & Stratton garantit le système de contrôle d'échappement de votre moteur pour la période de temps mentionnée ci-contre, sauf s'il a fait l'objet d'abus, de négligence ou d'un entretien inapproprié.

Le système de contrôle d'échappement comprend des pièces telles que le carburateur, le filtre à air, le système d'ignition, le silencieux et le convertisseur catalytique. Il peut aussi comprendre les connecteurs et autres pièces reliées à l'émission. Lorsque vous achetez votre petit moteur hors-route, B&S réparera gratuitement votre petit moteur hors-route incluant le diagnostic, les pièces et la main d'œuvre.

**Couverture de garantie Briggs & Stratton contre toute défectuosité du système de contrôle d'échappement**

Les petits moteurs hors route sont garantis contre la défectuosité des pièces du système de contrôle d'échappement pour une période de 2 ans, sujette aux conditions stipulées ci-contre. Si n'importe

quelle pièce de votre moteur couverte par cette garantie est défectueuse, elle sera réparée ou remplacée par B&S.

**Responsabilités du propriétaire**

En tant que propriétaire d'un petit moteur hors route, vous êtes responsable de veiller à l'exécution de l'entretien requis tel que stipulé dans votre manuel d'opération et d'entretien. B&S vous recommande de conserver tous les reçus couvrant les travaux d'entretien de votre petit moteur hors route, mais B&S ne peut refuser la garantie en raison d'absence de reçus ou pour défaut d'avoir suivi tout l'échéancier du programme d'entretien.

Vous avez la responsabilité d'apporter votre petit moteur hors route à un détaillant autorisé B&S aussitôt que survient un problème. Les réparations sous garantie doivent être complétées dans un délai raisonnable ne devant pas excéder 30 jours.

En tant que propriétaire d'un petit moteur hors route, vous devez être informé que B&S peut refuser d'honorer cette garantie si la défectuosité de votre moteur ou d'une partie de votre moteur est due à un emploi abusif, une négligence, un entretien incorrect ou une modification non approuvée.

Si vous avez des questions relativement à votre garantie, vos droits et responsabilités, veuillez communiquer avec un représentant de service B&S au numéro 1-414-259-5262.

**Dispositions de la garantie du système d'échappement Briggs & Stratton**

Ce qui suit concerne les dispositions spécifiques relativement à votre garantie sur le système de contrôle d'échappement. C'est une addition à la garantie B&S pour les moteurs non réglementés contenue dans le manuel d'entretien et d'utilisation.

**1. Pièces sous garantie**

La couverture de cette garantie ne s'applique que sur les pièces listées ci-contre (les parties du système de contrôle d'échappement) dans la mesure où ces pièces étaient présentes sur le moteur au moment de l'achat.

- a. Système de dosage du carburant
  - Système d'enrichissement de démarrage à froid
  - Carburateur et parties internes
  - Pompe à essence
- b. Système d'induction d'air
  - Filtre à air
  - Tubulure d'admission
- c. Système d'ignition
  - Bougies d'allumage
  - Système d'allumage électromagnétique
- d. Système catalyseur
  - Convertisseur catalytique
  - Collecteur d'échappement
  - Système d'injection d'air ou à pulsion
- e. Autres pièces utilisées dans les systèmes ci-haut mentionnés
  - Soupapes et interrupteurs de dépression, de température, de position.
  - Connecteurs et assemblages.

**2. Durée de la couverture**

B&S garantit le propriétaire initial et tous les acheteurs subséquents que les pièces sous garantie sont exemptes de vice de matière ou de fabrication qui pourraient causer des défauts des pièces sous garantie pour une période de deux ans à partir de la date à laquelle le moteur a été livré à l'acheteur.

**3. Aucuns Frais**

La réparation ou le remplacement de toute pièce sous garantie sera effectuée sans aucuns frais pour le propriétaire, incluant les frais de main d'œuvre pour le diagnostic afin de déterminer si la pièce sous garantie est défectueuse, conditionnel à ce que le diagnostic soit effectué chez un détaillant autorisé B&S. Pour la garantie relative au système d'échappement, communiquez avec le détaillant autorisé B&S le plus proche tel que listé dans les pages jaunes de votre localité sous la rubrique moteur à essence, tondeuse ou autre catégorie similaire.

**4. Réclamations et exclusions de la couverture.**

Les réclamations de garantie doivent être complétées en accord avec les dispositions de la politique de garantie B&S. La garantie ne couvre pas les défauts de pièces qui ne sont pas des pièces d'origine B&S ou dans le cas d'abus, négligence ou d'un entretien inapproprié. La garantie B&S ne couvre pas les défauts de pièces sous garantie qui ont fait l'objet d'ajouts, ont été modifiées ou de pièces qui ne sont pas des pièces B&S d'origine.

**5. Entretien**

Toute pièce sous garantie qui n'est pas remplacée au moment requis selon le manuel d'entretien ou qui est planifiée seulement pour une inspection régulière sous la mention « réparer ou remplacer si nécessaire » est garantie contre toute défectuosité pour la période de garantie. Toute pièce sous garantie qui est planifiée pour un remplacement tel que requis dans l'entretien est garantie contre toute défectuosité seulement pour la période de temps qui va jusqu'au premier remplacement prévu pour cette pièce. Toute pièce de remplacement équivalente en performance et durabilité peut être utilisée pour l'entretien ou la réparation. Le propriétaire est responsable de l'exécution de tout entretien requis tel que défini dans le manuel d'instruction B&S sur l'entretien et la réparation.

**6. Couverture indirecte**

La couverture ci-contre s'étend à toute défectuosité des composantes du moteur causée par la défectuosité de n'importe quelle pièce couverte par la garantie et dont la garantie est encore en vigueur.

**Consultez les informations sur la période de durabilité d'émission et l'INDICE d'air sur l'étiquette d'émission de votre moteur**

Les moteurs qui sont certifiés conformes aux normes standards d'émission du California Air Resources Board (CARB) Tier 2, doivent afficher l'information concernant la période de durabilité du système d'émission et l'INDICE d'air. Cette information est indiquée sur les étiquettes apposées sur les moteurs par Briggs & Stratton. L'étiquette du moteur indiquera les renseignements concernant la certification.

La **période de durabilité d'émission** indique le nombre d'heures d'utilisation normale pour lequel le moteur est certifié conforme aux normes d'émission sous réserve d'un entretien approprié tel qu'indiqué dans le manuel d'opération et d'entretien. Les catégories suivantes sont utilisées :

- Modéré** le moteur est certifié conforme pour 125 heures d'utilisation normale.
- Intermédiaire** le moteur est certifié conforme pour 250 heures d'utilisation normale.
- Prolongé** le moteur est certifié conforme pour 500 heures d'utilisation normale.

Par exemple, une tondeuse de modèle standard est utilisée environ 20 à 25 heures par année. Par conséquent, la **période de durabilité d'émission** d'un moteur dans la catégorie intermédiaire pour ce type de tondeuse équivaut à 10 à 12 ans.

L'**indice d'air** est un nombre qui décrit le niveau relatif d'émission pour une catégorie spécifique de moteur. Plus l'**indice d'air** est bas, plus le moteur est écologique. Cette information est indiquée sous une forme graphique sur l'étiquette d'émission.

**À compter du 1<sup>er</sup> juillet 2000, surveillez la période de conformité d'émission sur les étiquettes**

Après le 1<sup>er</sup> juillet 2000, certains moteurs B&S seront certifiés conformes aux normes environnementales d'émission standard du United States Environmental Protection Agency (US EPA) Phase 2. Pour les moteurs certifiés pour la Phase 2, la période de conformité d'émission mentionnée sur les étiquettes indique le nombre d'heures d'utilisation pour lequel le moteur rencontre les normes fédérales. Pour les moteurs de force moindre que 225 cc, la catégorie C = 125 heures, B = 250 heures et A = 500 heures. Pour les moteurs de 225 cc et plus, la catégorie C = 250 heures, B = 500 heures et A = 1000 heures.

Le remplacement du moteur portant le modèle de série 120000 est 206 cc, 200000 est 305 cc, 210000 est 342 cc.

**Ceci est une représentation des étiquettes d'émission que vous retrouverez sur les moteurs certifiés :**
